

WBA COUNCIL REMIT

(As of June 2023)

In this short document we lay out what the expectations are for this office, so you know what commitment is needed.

What is your role?

The role of the Council is to help the Association by:

- providing a strategic vision for its activities;
- clarifying the major barriers to delivering 50% of the Global Methane Pledge by 2030;
- providing guidance on how to overcome those barriers in a way which will support the development of the biogas sector globally;
- helping in the creation of alliances and partnerships for the Association and its members;
- feeding into the Association's reports and publications;
- engaging with other members to understand and feed in their views, as well as encouraging non-member companies to join the Association; and
- representing the Association externally when needed and requested by the CEO.

You will be called upon to reach out externally to promote the industry and the WBA, to suggest activities, to help find funding, and to participate in policy activities around the world.

You have no legal or financial responsibility towards the Association. The CEO formally represents the Association externally.

The Council will aim to meet at least once each year in person and will meet another 3 times a year by electronic conferencing.
