

agriportance GmbH

## YOUR ENABLER IN SUSTAINABLE ENERGY.

Biomethane | LCO<sub>2</sub> | Bio-LNG

### Services

#### agriportance Software

- Greenhouse Gas Accounting
- Mass balance
- Data governance
- Balancing group management
- Brokerage of Biomethane & LCO<sub>2</sub>
- FuelEU Maritime
- Webinars and Seminars
- Assistance with sustainability

certification in accordance with

REDcert-EU or ISCC-EU.

"WE INTEGRATE SUSTAINABILITY  
AND TECHNOLOGY TO FOSTER  
AN ENERGY ERA THAT IS  
INDEPENDENT, DIGITAL, AND  
ENVIRONMENTALLY FRIENDLY."

agriportance GmbH, headquartered in Münster, is a software firm specializing in renewable energy, particularly in biomethane and LCO<sub>2</sub>. The company provides biogas plant operators across Europe with digital solutions, consulting services, and transparent sales.

The central element is a multi-award-winning software designed for the creation of greenhouse gas and mass balances (e.g., for REDcert, SURE, ISCC). It digitizes the certification process, automates workflows, and provides Interfaces to registers, including the Union database, facilitate integrated audits and centralized data management, thereby enhancing efficiency.

Additionally, agriportance provides brokerage services for biomethane and LCO<sub>2</sub>, ensuring fairness, transparency, and cost-effectiveness for both producers and consumers.

Consulting, training, and support in the certification process, along with effective group management, complete the portfolio.

## Overview of agriportance's Service Portfolio

### Software for greenhouse gas and mass balance analysis

- An intuitive, browser-based solution for biogas facilities of any scale.
- Complies with all principal sustainability standards (REDCert, ISCC, SURE)
- Automated feasibility assessment and quantity verification
- Secure data storage and tamper-proof documentation

### Professional assistance in the certification process

- Personalized guidance on audit preparation and execution
- Training programs for novice and advanced learners

### Balancing group administration for biomethane

- Comprehensive operational processing: nomination, reporting, round-the-clock scheduling
- Assistance in assimilating into established supply chains

### Brokerage of biomethane and liquefied carbon dioxide

- Connecting producers and consumers through a reputable network.
- Expert in the field FuelEU Maritime
- Emphasize equitable, transparent, and economically sustainable contracts.

## Our Vision

**agriportance is advancing the European biomethane market by elevating market processes through innovative software solutions.**

## agriportance Software

The certification of biomethane and liquid CO<sub>2</sub> is becoming progressively intricate due to new regulations, more stringent audits, and heightened documentation requirements. With agriportance and our EBA and DLG award-winning software, you can consistently maintain oversight and automate your processes—ensuring legal compliance, transparency, and future readiness.

### What capabilities does the agriportance software possess?

The software integrates all pertinent functions into an intuitive, web-based application:

- **Mass balancing and greenhouse gas accounting in accordance with REDcert-EU, ISCC-EU, and SURE.**
  - → Automated and audit-resistant – optimally prepared for audits
- Creation and administration of **sustainability certificates**
  - → Integrated interfaces with UDB, among others
- Transparent **tracking of quantities** from input to output
  - → Optimal for producers, feeders, and marketers
- **Document management and audit readiness**
  - → All certificates, contracts, and documentation consolidated in a single location.
- Administer **various systems and languages**
  - → For operators possessing a global portfolio

"EFFICIENT, PROFICIENT, AND  
PERSONALIZED—COLLABORATING  
WITH AGRIPORTANCE IS  
REMARKABLE."

Manfred Gius

CEO

Biogas Wipptal GmbH

Since 2023, our facility has been overseen by agriportance GmbH under the ISCC system. This partnership has been consistently beneficial and marked by exceptional professional expertise. Notably, the monthly preparation of our GHG balance, accompanied by a concise management summary, enables us to make informed decisions swiftly. Owing to the close and Thanks to the organized support offered by

agriportance, I consistently felt well-prepared. The interaction with the auditors was systematically arranged and proactively facilitated by agriportance beforehand, characterized by exceptional, solution-focused coordination.

The personal interaction is consistently amicable, dependable, and enjoyable. We sincerely value the professional yet personal collaboration and anticipate our ongoing partnership.
